Subject index

A

Acetazolamide 333
Acetylcholine 34, 53, 500
– iontophoresis 188
– release 345
ACh-activated channels 101
ACh channels 101
Acidification 268, 692
Acidosis 268
Acinar cell 670
Acivicin 573
Aconitine 491
Action potential 69,173
– – threshold 481
Adenosine nucleotides 304
Adipose tissue 273
Adrenal chromaffin cell 613
Adrenaline 80, 283
β-adrenergic modulation 232
β-adrenoceptors 80
AF-DX 116 361
Afferent axons 180
α_2-agonist 273
Airway pressure 42
Aldosterone metabolism 529
Amiloride 58, 223, 243, 273, 333, 386, 505
Amino acid aminotransferase 676
– – oxidation 676
Amino acids 410
4-Aminopyridine 442
Ammoniagenesis 573
Amphibian skin 386, 540
Anion-selective channel 304
Antidiuretic hormone 606
Ant venom 212
Aorta 500
Apical membrane 259
– – capacitance 606
Apneic periods 42
Arteriovenous oxygen content difference 316
Ascending limb of Henle's loop 520
ATP 353
– analogue AMP-PNP 353
ATPase activity 620
ATP-jump 200
– regeneration 69
–-sensitive K channels 584
Autonomic nervous system 121
Avian hypothalamus 34
Axon 88

B

Ba^{2+} 58, 80, 361
Ba current 229, 289
Barium 268, 394, 514
Batrachotoxin 491
BAY K8644 590
Bee retina 339
Bias current 339
Bicarbonate conductance 514
– ion secretion 333
Bicycle ergometer 456
Biogenic amines 34
Bis-oxonol 450
Blood flow measurement 688
– pressure 160, 195, 226, 500
Bradykinin 27
8-Bromo-cyclic AMP 450
Brown adipose tissue 273, 593
Butanedione monoxine 76

C

Ca^{2+} 450
Ca^{2+}, extracellular 394
Ca^{2+}, resting 648
Ca^{2+} activation of the contractile proteins 132
Ca^{2+} channels 401
Ca^{2+} current 554
Ca^{2+}-free EGTA solutions 188
Ca^{2+}-ionophore ionomycin 450
Ca^{2+}-release 69
$^{45}Ca^{2+}$ transport 564
Ca^{2+}-uptake 126, 132
Ca channel agonist BAY K 8644 401
– – blockers 442
– – current(s) 229, 289
Ca-channels 180
Ca-current 235, 423, 695
Cadmium 180
Caecum in vitro 333
Caffeine 132, 648
–-induced tension transient 371
Caged-ATP 200
– GMP-PNP 628
– GTP-γ-S 628
– nucleotides 200
Calcium 17, 132, 296, 353, 520, 648
Calcium accumulation 558
– channel(s) 232, 371, 590, 628, 661
– conductance 173
– current 401, 481, 554
– transients 76
Calmidazolium 378
Capacitance measurements 137
5 (and 6)-carboxy-dimethyl-fluorescein 47
Cardiac muscle 600
– myocyte(s) 232, 462, 558
– output 316
– – distribution 593
– Purkinje fibres 69
Cardiopulmonary afferents baroreceptors 160
– deafferentiation 160
Carotid artery 500
– body 436
Catecholamine stimulation 273
– stores 436
Cd 401
Cd^{2+} 17
Cell capacitance 204
– dialysis 204
– fusion 220
– membrane potential 394, 514
– Na-activity 606
– swelling 223
– volume 410
– – regulation 514
Cellular electrophysiology 345
Central chemoreceptors 278
– synapse 345
Cerebrovasculature 698
Cesium 235
Channel kinetics 17
– pore 304
Channels 101
Chemical denervation 593
Chemoreceptors 278
Chloramine-T 423
Chloride 259
– activity 670
– channel blockers 252
– channels 670
Chloride conductance 252,514, 540
– transport 386, 546
Cholecystokinin 53
Choline 339, 410
Chromaffin cells 204
Cl^- channel 450
– – blockers 546
Cl^- conductance 80
Cl^-/HCO_3^- 333
– antiport 546
– exchange 47
Cl^- transport 520
Clonidine 273
Co 401
Coarctation of aorta 500
Co^{2+} 188
Collecting tubule hydrogen ion secretion 692
Colon 606
Concentration gradients 259
–-jump technique 590
ω-Conotoxin 695
Contractile properties 620
– proteins 132
Contraction 76, 296, 564
Contracture force 648
Cooling of the brain 456
Corticosteroid metabolism, renal 529
Cotransport 328
Counter-current cooling 456
Crayfisch neuromuscular junction 469
– giant axon 88
– muscle 8, 17
Cross-bridge theory 642
Cs^{2+} 80
Cs^+ 312
Cultured smooth muscle cell 304
Current-voltage-relations 606
– – relationship 167
Cutaneous sympathetic 121
Cyclic AMP 450, 546
Cytoplasmic extract 353
cAMP 613
– analogues 613

D

DC-current(s) 361, 469, 478
Dehydration-rehydration of lipid films 94
Delayed rectifying K^+ current 613
Diabetes mellitus, experimental 564
Diaphragmatic activity 42
Dibutyryl cyclic AMP 546
3',5-Dichlorodiphenylamine-2-carboxylic acid (DCI-DPC) 546
1,4-Dihydropyridines 590
3,4-Dihydroxyphenylacetic acid (DOPAC) 436
Diltiazem 423
Diluting segment 268
Diphenylamine-2-carboxylic acid (DPC) 252
Distal sodium delivery 259
Dithiothreitol 520
Divalent cations 540
Domperidone 278
Dopamine antagonists 278
– efflux 436
Dorsal root ganglion 695
Dorsal root ganglion neurone 628
Douglas bag method 456

E

Ear artery 590
EDRE 500
EGTA 353, 554
Electrical activity 564
Electrodiffusion 101
Electrolyte transport 333
Electromagnetic blood flow measurement 688
Electromotive driving force 243
Electron microprobe analysis 259, 681
Endothelial cells 378
Endothelium-dependent relaxation 500
– -derived relaxant factor 378
Endotoxic lipopolysaccharides 121
Endotoxin 147
1-Epinephrine 450
Epithelial tissues 386
Esophageal temperature 456
ETH 1907 216
Excitatory channel on crayfish muscle 17
– channels, crayfish musc
– postsynaptic receptors 478
Exercise training 316
Exocrine pancreas 53
Extracellular calcium 469

F

Fatty acid profiles 564
Fendiline 378
Fever 121
Fibroblast 554
Fick technique 316
Flash photolysis 200, 628
Fluid secretion 53
Fluorescence 648
Flux parameter 584
Force-interval relation 620
– -length relation(s) 637, 642
– -velocity 620
Forskolin 450, 613
Frog kidney 216
Fura-2 648
Furosemide 58, 676
Furosemide action 579

G

GABA 17
Gamma glutamyltransferase 573
Gating currents 491
– kinetics 312, 584, 584
Giant cells 220
Glial cells 654
Glomerular filtration rate 322
Glucose oxidation 676
Glutamate 17
L-glutamate 8
Glutamate activated channel(s) 8, 17
Glutamine 328
– utilization 573
Guanine nucleotide binding protein 628
Guanosine triphosphate analogues 628
5'-guanylylimidodiphosphate 628

H

Haloperidol 278
Halothane 648
HCO_3^- transport 58
Heart 232, 462, 704
– cells 235, 353
– rate 195
– – plasma renin activity 160
Heat production 600
Heavy metal ions 540
Henle's loop 520
High-frequency oscillatory ventilation 42
High-voltage-activated Ca-channel 695
Histidine transport 328
H^+/Ca^{2+} interaction 69
H^+ selectivity 216
Human skeletal muscles 637
Hydrogen ion secretion 692
– –-selective microelectrode 216
Hyperkalemic periodic paralysis 283
5-Hydroxytryptamine 34
– (5-HT) 394
Hypertension 160, 500
Hypertensive rats 195
Hyperthermia 226, 593, 648
Hypothalamus 34
Hypotonic media 514
Hypoxia 436
– -reoxygenation 558

I

ICS 205–930 394
Inactivation 235, 289
Individual distal tubule cells 259
Indomethacin 579
Inhibitory synapse 478
– transmitter quanta 469
Inositol 1,4,5-triphosphate 296
Insulin-secreting cells 401
Intercellular spaces 153
Internal Ca-store 296
Intestinal smooth muscle cells 229
Intracellular calcium 353, 450
– electrolyte concentrations 259
– ion activities 283
– – concentrations 505
– microelectrodes 394, 505
– pH 47, 69
Intracerebroventricular injection of PGE_2 121
Ion activities 283
– channel proteins 94
– channels 654
– fluxes 252
– permeation 101
– selective microelectrodes 69, 339
– selectivity 304
Ion-sensitive micro-electrode 410
Ionic currents 361
– permeabilities 8
– substitution 235
Iontophoresis 188
Isolated cardiac myocytes 462, 564
– dog kidney 147
– perfused ducts 58
– rat kidney 529
– smooth muscle cells 289
– vessels 698
Isometric twitch tension 126
Isoproterenol 232, 273, 704

J

Juxtaglomerular apparatus 322

K

K concentration 243
K-depolarization 606
Ketanserin 394
Kidney 113, 259, 268, 514
–, ammoniagenesis 573
– epithelial (MDCK) cells 450
– in liver disease 147
slices 529
Kinetics 429
K^+ buffering 654
K^+ channel(s) 94, 450, 613
K^+-channel blockers 167
K^+ concentration 584
K^+ conductance 58, 220, 514
K^+ conducting channels 654
K^+ current 361
K^+ depolarization 69
K^+ sensitive microelectrodes 268
K^+ Transport 268

L

La^{3+} 17
Laser diffraction system 462
Lateral space resistance 153
Leucine 676
Li^+ 312
– saline 478
Liposome 94
Liquid ion-selective microelectrodes 212
Lithium 478
Liver 328
– slices 529
Loop of Henle-Prostaglandins 579
Lymphatic smooth muscle 167

M

Madin-Darby canine kidney cells 394
Malignant hyperthermia 226, 648
Mast cells 137
M-channel 80
M-current 361
MDCK-cells 394
Meclofenamate 579
Medullary thick ascending limb 676
Membrane 661
– excitability 173
– hyperpolarization 283
potential 450, 505
– properties 701
– vesicles 328
Metabolic alkalosis 259
– rate 456
Methysergide 394
Mg^{2+}-acetate 410
Microelectrode(s) 212, 216, 339, 514
Microiontophoresis 34
Miniature end-plate currents 188
Mitochondria-rich cells 386
Mn^{2+} 188
Motoneurons 410
Mouse Swiss 3T3 fibroblasts 554
Müller cells 654
Multiple cable model 153
Muscarinic autoreceptors 345
– receptor 361
Muscle 200, 283, 637, 642
–, fast-twitch 126
– cell 304
– fatigue 416
– fibers 1
– stimulation (in situ) 416
Myelinated nerve fibre 491
Myocardial fibers 132
Myocardium 620
Myocytes 564, 704
Myofibrils 620
Myofilaments 564
Myogenic tone 698
Myometrium 296
Myoplasmic calcium 648
Myosin 620
Myothermics technique 600
Myrmica ruginodis 212
Membrane excitability 173

N

Na 681
Na^+ 312
Na/aminoacids 220
Na/Ca action potentials 180
Na channel(s) 88, 401, 423, 606
Na^+-channel 1
Na concentration 243
Na current(s) 423, 491
Na^+ current 429, 481
Na/glucose 220
Na/HCO_3 220
Na-histidine cotransport 328
Na^+/H^+ 333
Na^+/H^+ antiport 47, 58
Na^+/H^+ antiporter 223
Na^+/H^+ exchange 268, 273
Na inactivation 88
$(Na^+ + K^+)$-ATPase 58
Na^+/K^+ pump 283
– – inhibitor ouabain 268
Na pathway 386
Na-permeability 606
Na transport 243, 505
– – compartment 681
Nerve-muscle synapses 469
N-ethylmaleimide 520
Neuromuscular junction 188
Neuron(e)s 628, 661
Neutral carriers 216
NH_4^+ excretion 573
Ni 401
Nicardipine 289, 423
Nicotinic autoreceptors 345
Nifedipine 590
Nikolsky equation 339
N-methyl-D-glucamine 235
Nociceptor 27
Node of Ranvier 312, 491
Noise analysis 345, 469, 478
Non-quantal release 478
Nonshivering thermogenesis 593
Noradrenaline 34, 436
Norepinephrine 226
Novobiocin 243, 505
Nystatin 681

O

O_2-consumption 456
Olfactory cortex 180
Opto-electronic system 462
Ouabain 220, 268, 676, 681
Oxidative metabolism 676
Oxotremorine 345
Oxygen uptake 316

P

PAH secretion 573
Pancreas 53
Pancreatic B-cells 429
– ducts 58, 546
– islet B-cell 401
– β-cells 613
Papillary muscle 132, 558, 600
Paracellular K^+ transport 268
Parachloromercuribenzene sulfonate 520
Paralysis 76
Paraminohippurate 573
Paravertebral sympathetic neurones 80
Parvalbumin 126
Patch clamp 8, 53, 94, 101, 204, 229, 429, 481, 554, 613, 695
– – technique(s) 137, 289, 590
– pipette 204
– recording technique 173
Peripheral chemoreceptors 278
PGE_2 147
PGI_2 378
Phentolamine 394
Pheochromocytome cultured cells 223
Phosphocreatine hydrolysis 69
Phosphodiesterase inhibitors 613
Phosphorylation 353
– -dephosphorylation 353
Photoactivation 628
Photolysis experiments 200
Pituitary cell excitability 173
Plasma membrane vesicles 328
– volume 160
Polymyxin 147
Porcine muscle 416
Portal blood 147
Postsynaptic potential 361
Potassium 259, 339
– channel(s) 232, 584
– conductance 173, 394
– current 312
– depolarization 252
– -dependent toxin action 88
Preganglionic fibers 701
Prepontine knife cut 593
Pre-synaptic Ca-channels 180
Procaine 386
Prolactin secretagogue 173
Propylbenzilylcholine mustard 361
Prostacyclin 378
Prostaglandin E_2 121
– synthesis 579
Proximal convoluted cells 220
– tubule(s) 216, 514
Pulmonary artery 423
– stretch receptors 42
Purkinje fibres 69
Pyrogen 121
pH 520
–, Na^+/H^+ exchange 273
– -sensitive absorbance 47
– – dyes 47

Q

Quantal postsynaptic currents 17
– release 188, 478

R

Rate theory 101
Rb^+ 94
Rb-uptake 681
β-receptor agonists 232
Recovery heat production 600
Rectifier potassium channel 232
Rectus femoris muscle 642
Relaxation in isolated myocardium 558
Renal ammoniagenesis 573
– artery stenosis 688
– blood flow 688
– hemodynamics 147
– medulla 520
– metabolism 676
– prostaglandins 579
– sympathetic 121
– tissue in vitro 529
– tubular cells 259
Renin-angiotensin system 147
Renovascular hypertension 688
Respiration 278
Respiratory alkalosis 692
– facilitation 27
– rate 273
– suppression 27
Retina 654
Retinal glial cells 654
– pigment epithelial cells 47
„Run-down" of Ca current 353
Ryanodine 132, 371, 558

S

Salivary glands 670

Sarcomere dynamics 462
Sarcoplasmic reticulum 69, 76, 126, 132, 371, 558, 620
Sea anemone toxins 88
Selective microelectrodes 670
Selectivity factor 339
Sensory neuron(s) 628, 661, 695
Serotonin 394, 698
SH reagents 520
Shunt pathway 540
SITS 58, 546
Single calcium channels 661
– cardiac myocytes 558
– channel current 584
– – recordings 94
– channels 101
Single heart cell(s) 235, 353, 584
Sino-aortic denervation 160
Skeletal muscle 1, 76, 283, 416, 648
– – fibres 101
Skinned fibers 296
– myocardial fibers 132
– striated muscle fibre 371
Sleep-wake cycle 195
Slow excitatory postsynaptic potential 361
Smooth muscle 167, 423
– – cells 229, 289, 590
Sodium 259
–, carotid body 436
– current 481
– currents, node of Ranvier 491
– nitroprusside 226
– permeability 540
– transport 386, 606
Spatial buffering 654
Spermatic artery 27
Spinal cord 410
Spontaneous quantal release 469
Sr, Ba-current 661
Staircase phenomenon 126
Standard nomenclature 113
Steroids 529
Streptozotocin 564
Stress 226
Striated muscle 371
Stroke volume 316
Structures of the kidney 113
Sulphur dioxide 42
Superfusion 436
Superior cervical ganglion 481
Surgical denervation 593
Sympathetic differentiation 121
– ganglia 80, 701
– nerve activity 121
– nervous system 226
– neurone 361
Synaptic channel 8, 17
– noise analysis 345

T

TEA 167
Temperature 101
– regulation 34, 121
Tension transients 371
Testicular afferents 27
Tetraethylammonium 339
Tetramethylammonium 410
Tetramorium caespitum 212
Tetrodotoxin 1, 423
Theophylline 333
Thermoresponsive neurons 34
Thick ascending limb 676
Thyroid hormones 620
Tight junction resistance 153
Tityus toxin 1
Tracheal epithelium 252
Transcellular K^+ transport 268
Transepithelial conductance 243
– Na transport 243, 505
Transepithelial parameters 243
Transient outward current 442
Transmembranal electrolyte concentration gradients 259
Transmitter analysis 34
– quanta 469
Transmural pressure 698
Transport systems 58
Trifluoperazine 378
TTX 188
T-type Ca channel 704
Tubular epithelia 153
– Na^+-current 1
– resistance measurements 153
Tubuloglomerular feedback 322
Tympanic membrane temperature 456
Tyrosine 436

U

Ultrastructure 564
Unmyelinated axons 180
Urinary bladder 681

V

Vagal reflexes 42
Vascular smooth muscle cell 304
Vas deferens 289
Vasoactive intestinal polypeptide 173
Vasopressin 450
Vasotocin 606
Ventilation 42
Ventilatory response to CO_2 278
Ventricular fibres 442
– heart cells 235
– myocytes 564, 704
Veratridine 469, 478
Vessel constrictors 688
Visceral afferents 27
Voltage clamp 188, 423, 478, 481, 491
– – analysis 80
Voltage-dependence 304, 429
– of calcium current 235
– -gated membrane currents 481
Volume expansion 322
– regulation 223

W

Whole-cell patch clamp 554
– recording 289

X

X-ray microanalysis 505
